

ADARSH KADAM

AI Engineer | Machine Learning Engineer | Agentic AI & Generative AI Specialist

+91 8349910482 | adarshkadam635@gmail.com | linkedin.com/in/adarshkadam635 | github.com/adarshkadam635

PROFESSIONAL SUMMARY

Results-driven AI Engineer and Machine Learning Engineer with hands-on experience building autonomous AI agents, production-grade Retrieval-Augmented Generation (RAG) architectures, and deep learning systems. Proficient in Python, PyTorch, TensorFlow, LangChain, OpenAI API, and Claude API for Large Language Model (LLM) application development. Demonstrated ability to design end-to-end machine learning pipelines, fine-tune LLMs, implement Natural Language Processing (NLP) solutions, and deploy scalable FastAPI backends. Seeking an AI Engineer, Machine Learning Engineer, or Generative AI Engineer role to deliver impactful, real-world AI solutions.

TECHNICAL SKILLS

AI / LLM / NLP: RAG (Retrieval-Augmented Generation), Agentic AI, Autonomous Agents, Large Language Models (LLM), Prompt Engineering, Tool Calling, Fine-Tuning, OpenAI API, Claude API, Hugging Face, LangChain

Machine Learning & Deep Learning: PyTorch, TensorFlow, Scikit-learn, CNN, LSTM, GRU, ResNet, Transfer Learning, Data Augmentation, Multi-GPU Training (NVIDIA A6000), Model Optimization, Real-Time Inference

Programming Languages: Python (Expert), C++, Java, SQL

Backend & DevOps: FastAPI, REST APIs, Docker, AWS, Git, GitHub, GitHub Actions, Linux

Vector Databases & Data: ChromaDB, Pinecone, Pandas, NumPy, Tavily Search API, Semantic Search

Tools & Platforms: Jupyter Notebook, VS Code, Gradio, OpenCV

WORK EXPERIENCE

AI Engineer

June 2026 – Present

EndorseCC | India

- Engineered and integrated AI/ML solutions using OpenAI, Gemini, and Anthropic models.
- Developed LLM-powered applications and AI agents for business automation and intelligent workflows.
- Implemented Prompt Engineering, NLP pipelines, RAG systems, and knowledge-based AI solutions.
- Worked on dataset processing, model evaluation, optimization, and AI response quality improvement.
- Collaborated with engineering and business teams to integrate AI capabilities into real-world products.

Tech: Python, LLMs, OpenAI, Gemini, Anthropic, RAG, NLP, Prompt Engineering, AI Agents, APIs, Git.

AI Engineer & Software Developer

January 2023 – January 2026

Indore Sunlight Pvt. Ltd. | Indore

- Developed and maintained the company website and CRM system for managing customers, leads, and business operations.
- Built a RAG-based AI system for querying the company's privacy policies and internal knowledge.
- Developed AI agents for WhatsApp, Email, and messaging automation, reducing repetitive manual communication.
- Built AI Customer Support and Query Agents for automated customer interaction and information retrieval.
- Developed an Employee Management System with real-time employee activity and monitoring capabilities.
- Integrated AI, APIs, databases, and automation workflows to improve business processes and operational efficiency.

Tech: Python, JavaScript, React, APIs, SQL/NoSQL, RAG, LLMs, AI Agents, NLP, Git, Docker.

Freelancer.com and Fiverr.com AI Engineer — Agentic AI & Automation

Dec 2024 – Present

Self-Employed | Remote

- Designed and deployed autonomous AI agents using OpenAI and Claude APIs for lead generation and automated customer support, reducing manual operational workload by 40%.
- Engineered production-ready Retrieval-Augmented Generation (RAG) pipelines with LangChain and Pinecone, delivering high-precision semantic search over enterprise knowledge bases.

- Built scalable FastAPI backends integrating AI agents with external platforms (CRMs, Slack), enabling real-time, end-to-end agent lifecycle management.
- Implemented tool calling and multi-step reasoning chains, empowering agents to autonomously complete complex business workflows.

PROJECTS

Autonomous Business Research Agent 2025

Python, LangChain, OpenAI API, Tavily Search API, FastAPI

- Built a production-level agentic AI system performing multi-step autonomous research and generating verified, structured business intelligence reports.
- Implemented self-correction loops within agentic workflows to minimize hallucination rates, improving final output reliability by 30%.
- Deployed via FastAPI backend pipelines, enabling sub-2-second real-time agent execution.

SentinelDrive — Real-Time Driver Drowsiness Detection 2025

Python, PyTorch, TensorFlow, OpenCV, Multi-GPU Training

- Developed a multi-modal deep learning system combining CNN, LSTM, and GRU networks for real-time driver drowsiness detection.
- Implemented multi-GPU parallel training across 3x NVIDIA A6000 GPUs, maximizing model throughput and scalability by 2.8x.
- Integrated deep facial landmark analysis and synthetic biometric signal processing for accurate anomaly detection.

Plant Disease Classification — Computer Vision Feb 2025 – May 2025

Python, PyTorch, ResNet-9, Gradio

- Implemented a custom ResNet-9 convolutional neural network (CNN) for automated multi-class classification of agricultural plant diseases.
- Optimized the training pipeline to achieve 94.5% diagnostic accuracy for real-time inference.
- Deployed an interactive Gradio web application for instant disease diagnostics.

SmartRAG — Cardiac Risk Monitoring 2024

LlamaIndex, Pinecone, Claude API, Python

- Architected a Retrieval-Augmented Generation (RAG) pipeline to analyze medical signals and clinical documentation for predictive cardiovascular insights.
- Connected Pinecone vector database to a Python backend, enabling low-latency semantic retrieval.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering Aug 2022 – June 2026

Lovely Professional University | Punjab, India

- Specialization: AI Engineering, Agentic Workflows, Production-Level Backend Systems
- Relevant Coursework: Machine Learning, Deep Learning, Data Structures & Algorithms, Database Management Systems (DBMS)

CERTIFICATIONS

- Fundamentals of AI Agents Using RAG and LangChain — Coursera
- Building Generative AI-Powered Applications with Python — Coursera
- Generative AI Engineering and Fine-Tuning Transformers — Coursera
- Generative AI Advanced Fine-Tuning for LLMs — Coursera
- Generative AI Foundational Models for NLP & Language Understanding — Coursera
- Generative AI and LLMs: Architecture and Data Preparation — Coursera
